

The all-new CRF1000L Africa Twin

Powered by passion, purpose and exhilarating performance, the all-new 2016 Honda CRF1000L Africa Twin is ready to make every ride a new adventure. Inspired by its bold Dakar ancestry, the all-new CRF1000L has evolved to blend Honda's proven adventure experience with reborn performance, advanced technology and rally-bred durability to tackle any terrain.

A first for the category, the Africa Twin will feature the option of a new evolution of Honda's Dual Clutch Transmission (DCT) technology, which remains unique to Honda in motorcycling. This latest evolution of DCT has been specifically developed and programmed to provide the off-road ability with which the Africa Twin is synonymous.

Much like the original XRV650 Africa Twin, launched back in 1988, the all-new CRF1000L Africa Twin is set to redefine expectations of just what a large-capacity adventure motorcycle can and should be capable of, both on and off-road, and opens an entirely new chapter in Honda's illustrious history of dual-purpose motorcycles made for true adventure.

The Honda CRF1000L represents the long awaited return of a legend, once again setting a new benchmark beyond ordinary adventure touring motorcycles. You've heard the stories, now prepare to meet the legendary **CRF1000L Africa Twin**. Let the new adventure begin. [Read full press release...](#)
